

These patented portable sets are combinations of 3 small AirTrack P3 elements that can be used as standalone equipment or on top of an AirTrack. Stack 1, 2 or all 3 elements on top of an AirTrack for methodical training exercises, or use the complete set as a child friendly vault box.

Using the AirBox mounting kit, the AirBox can be firmly anchored to an AirTrack, AirFloor or any other object.

The 90 cm AirBox is a great alternative for a regular vault box or Pegasus for gymnastics and schoolsports. Using the 140 cm AirBox you can create even more creative set-ups for gymnastics, schoolsports, freerunning and parkour.

Using the AirBox, children will learn their skills faster, safer and with more fun!

AirBox Set (3 pcs) - 0.9 m
