## Assembly

**Tools required:** -

**Number of people required:** 2

**Time required:** 5 min

For insurance reasons, the foam core and the jumping cube cover are sent separately. The assembly of the jumping cube is quick and uncomplicated. Please note the following assembly steps:

1. Lay out the foam core on a free flat surface.
2. Open the zip of the mat cover.
3. Carefully fold the bottom part of the cover over the foam core so that the foam fills the corners.
4. Now fold the foam block over the flat, already covered bottom side. Pull the upper half of the cover (upper part of the grid) completely over the foam core so that the foam again fills the corners exactly.
6. Now slowly close the zip.

When the cover has been put over properly, the zip can be closed easily.

If the zip is difficult to close, please correct the cover, which is then not yet fitted correctly. **DO NOT** close the zip under high tension!

## Maintenance and care / additional information

**Information regarding regular inspection:**

- Perform a visual inspection at regular intervals.
- Due to our continuous quality control of the products, technical changes may occur which may lead to minor changes to the instructions.
- Check the product for any damage and replace worn parts.

Should you have any questions, we are happy to help.
